# Jonah Spencer

Student Developer/Mentor at OSU Center for Applied Systems and Software.

Corvallis, Oregon Area

## Summary

Student at Oregon State University

Team lead for an 8-person team building modern workflow software for clients and their customers.

---

## Experience

OSU Center for Applied Systems and Software

1 year 1 month

Student Developer, Mentor

September 2018 - Present

Corvallis, Oregon Area

- Mentor: encouraging the growth of fellow developers both professionally and personally.

- Leading an 8-student developer and analyst team modernizing the Oregon State Construction Contractor Board's (OSCCB) licensing application, review, and management procedure.

- Primarily working with: .NET Core c#, T-SQL, and XUnit while using agile methodologies.

Previous projects/tasks:

- Worked directly with OSCCB and senior staff to understand/document their current workflow, then worked with the client to architect a new flow.

- Spearheaded improvement and client relations for USDA fruit breeding and planning software.

- Lead a 3-student team on improvements to the fruit breeding software as well as a variety of Oregon State University software that needed minor maintenance.

Student Developer

May 2018 - September 2018 (5 months)

Corvallis, Oregon Area

- Lead the development of the Oregon Department of Transportation (ODOT) ticketing feature designed to assist technicians in creating repair orders for various ODOT devices.
- Assisting on a variety of ODOT projects including the tripcheck.com local entry application.

## ATI Specialty Alloys and Components

IT Support Technician

August 2017 - May 2018 (10 months)

Albany, Oregon

- IT specialist responsible for ATI plants worldwide.
- Specialized in automating tasks, creating hot-fixes for engineering software, creating debug scripts, and automated deployment of software for engineering purposes.

## ATI Cast Product Salem Operations

LOTO Specialist

September 2016 - August 2017 (1 year)

Albany, Oregon

- Created documentation for a new LOTO (Lockout-Tagout) safety software.
- Revised the LOTO program in accordance with corporate and OSHA policies.
- Created LOTO documents for both Cast Products locations.

## ATI Specialty Alloys and Components

Acid Treatment Technician

September 2014 - September 2016 (2 years 1 month)

Albany, Oregon

- Monitor various systems for any issues or opportunities to enhance the process.
- Find solutions to problems in the acid or caustic systems.
- Understand the over 50-mile long piping system we are responsible for in order to find root-causes of a variety of issues.
- Develop an abstract view of the system and document this abstraction for future training purposes.

## Camp Magruder

Summer Resource Staff

June 2014 - September 2014 (4 months)

Rockaway Beach, OR

- Lifeguarding
- Leading Camp Activities and group-bonding exercises for multiple age groups (elementary through college)
